Kazeem Onisarotu

Front End Software Developer

👤 Profile

Enthusiastic front-end developer with 3 years of front-end development with VueJS and NuxtJS and a range of technical and non-technical skills to excel in the different stages of an agile software development which encompasses (design, implementation, testing, maintenance). I'm passionate about learning, curious about technology and continuously looking to develop more skills and acquire knowledge to better my craft.

💼 Employment History

Software Developer at Orb Solutions, Lagos

April 2018 — November 2019

Worked primarily as a project lead/software developer responsible for handling the front-end development of web applications for clients (with HTML, CSS, JS, JQuery, VueJS, NuxtJS), lead and coordinate agile projects to ensure clean and maintainable code practices and all deadlines/goals of projects are met, maintaining the remote Linux servers which hosted the projects.

Projects delivery includes:

West Midlands Open University: - Design and development of an Administrative & Student Portal, CMS & Website that handled day to day University activities such as registration, payments, exam scheduling etc.

- http://wmuonline.org/

Sooblaw:- Front-end design and development of a Website and CMS for a reputable law firm

- https://www.sooblaw.com/

Lagelu FM & Splash FM:- Front-end design and development of a CMS & Website for radio stations involving date and time manipulation for accurate program scheduling, Howler.js for working with audio.

- http://www.lagelufm.com/

- https://www.splashfm1055.com/

MAPV3:- Design and development of an Administrative & Student Portal for primary and secondary schools to handle tasks such as registration, payments, exam scheduling, timetable and attendance monitoring etc.

Intern at Smart Systems, Lagos

June 2013 — September 2013

Intern experience working with Java to develop a system secondary schools use to handle tasks such as attendance monitoring, grading and results and integration of time tables.
